

Duet

Stool

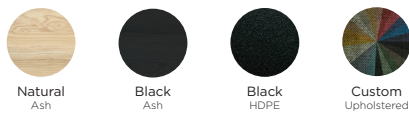

Description

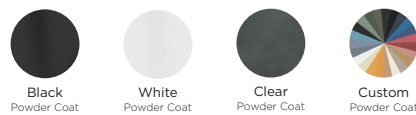

The Duet stool presents a harmony of versatility and beauty. Its blend of inviting timber or upholstery seat with a gracefully slender base enables options for both indoor and outdoor settings. The gently radiused curve of the seat provides a consistent element throughout the range. It is available in either a solid ash or upholstered top for indoor use, or black recycled HDPE for outdoor durability.

Bases can be powder coated in virtually any colour. The stool is available in three heights, 450mm, 650mm and 750mm to suit a range of different contexts.
