

# Oak

## Pendant Light

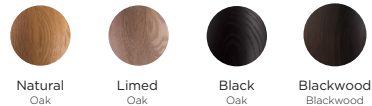

### Description

Oak is a sustainably sourced timber pendant light. Each light shade is hand crafted and defined by the grain of the oak selected. The body of the light is accentuated by the intersecting hole, which allows a variety of hanging options with the cord wrapping through and around the hole detail.

The light is available in two sizes, and four finishes including the Blackwood Oak finish. Oak comes with a black ceiling canopy to suit the hanging and a standard 2m of black cloth cord. The product comes standard with a dimmable 9W LED globe.
