

Noon Mirror

Installation Guide

Rear view of Noon Mirror

Dimensions

800DIA x 30mm, 12kg

Instructions

The Noon Mirror is supplied with a *button-fix* wall fixing. This includes a grey fixing attached to the rear of the mirror and a green button that is used to anchor the fixing to the wall.

You will be required to supply your own fastener to mount the mirror. Please ensure this is appropriate for the wall on which the mirror is being mounted and for the weight of the mirror (12kg).

Noon Mirror

Installation Guide

Mounting to the Wall

1. Remove the green button from the grey fixing mounted on the rear of the mirror, by sliding it down and pulling it out.

2. Using the appropriate wall fastener,* screw the button into the wall at the desired height. The fixing is located 150mm from the top of the mirror.

3. Locate the fixing on the back of the mirror over the button. Once in place lower the whole mirror down approx 15mm to engage the button.

4. Once engaged the fixing should 'click' into place. Carefully ensure the mirror has located correctly and is hanging straight on the wall by rotating it slightly.

*Please ensure the appropriate wall fastener is used to mount the mirror. The fastener must be appropriate to the type of wall it is anchored into and able to support the weight of the Noon Mirror (12kg).

Safety Precautions

- Please refer to the instructions at all stages of the installation process.
- Please do not modify or adjust the product in a way that is not clearly stated or intended.
- This product is intended solely for indoor use.
- Ross Gardam™ is not responsible for any damages caused by not following the provided instructions or by using an inappropriate wall anchor.
