## Australian Designer Ross Gardam Launches New Lighting Collection in the U.S. at ICF New York 2019

Melbourne, Australia, April 25, 2019—[Ross Gardam](#) will unveil his new contemporary lighting collection at ICF New York May 19-22 at the Jacob K. Javits Center.

The award-winning studio will introduce new versions of the **Nebulae Chandelier** and debut the sculptural and Brutalist inspired **Hemera Desk Lamp**. Ross Gardam will be located at **booth #1763**.

*"I'm excited to share our latest work with A+D community in the U.S. The new horizontal configurations of the Nebulae Chandelier is designed to illuminate large formatted spaces, even when turned off, it has a beautiful motion to the glass elements as they diffuse each other and the surrounding environment,"* said Ross Gardam. He adds *"Hemera is an ode to the beauty of natural materials in its purest and simplest form. I wanted to create the appearance that the material emitted light naturally, or that the stone itself was glowing"*

A key selection of Ross Gardam's lighting range will also be featured at the show including the **Polar Wall and Desk Light**, **Ora Desk Lamp**, **Oak Pendant**, and **Nebulae Wall Light**.

Ross Gardam returns to ICF for the second year with an expanding portfolio of local projects. It marks the studio's growth and ongoing commitment to the Americas region.

**ICF New York, May 19-22 2019**

Booth # 1763

### **The New Nebulae Chandelier**

The new versions of the Nebulae Chandelier will be available in horizontal configurations and feature pearl discs. The geometric machined form is coupled with the fluid glass discs, the layering of glass represents a highly original exploration of diffusion and creates unique light dispersion.

The Nebulae collection is inspired by the diffusion of both natural and LED light. The collection consists of the Nebulae Chandelier, Nebulae Wall Light, and Nebulae Pendant.

### **Hemera Desk Lamp**

Handcrafted with Elba marble, Hemera is a stunning piece with two solid circular volumes intersecting with no overt visible light source, creating a striking desktop monolith device refined for functionality. Hemera is reminiscent of brutalist architecture—powerful in its simplicity of form, it's the latest addition and was designed for the NEW VOLUMES™ collection.

### **Ora Desk Lamp**

The form of the Ora Desk Lamp is characterized by its unique orbiting shade. A clever magnetic joint allows the user to tilt the shade, directing the warm glow and then cycle the shade around the body. The hidden magnetic joint helps Ora to snap back into the horizontal position and a new poly ring provides a softer, smoother rotating action.

### **Polar Wall Light**

The circular motif used throughout the Polar collection defines its minimal operative form. The product uses a unique hinge joint allowing the disc to pivot up or down, softly directing the light output. The Polar Wall Light has the ability to cleverly manipulate light and shadow within a space.

### **Polar Table Lamp**

Reflection of light and shadow. Polar directs light within space while also having the ability to create a circular light void. The user pivots the circular disc around the light source located in the body. A circular motif is used not only in the shade but repeated at various junctions on the base, defining its minimal form. The ceramic base is handcrafted using traditional slip casting and the surface is bisque fired and presented unglazed.

### **Oak Pendant**

Timber for Oak is sourced sustainably to create the pendant light. Each Oak light shade is handcrafted and defined by the grain of the oak selected. The body of the light is accentuated by the intersecting hole, which allows a variety of hanging options with the cord wrapping

### **Nebulae Wall Light**

The Nebulae Wall Light is a statement in any space and supplies a beautiful adjustable light level. The wall light can be specified with a single glass disc or layered with an additional disc to create expansive light dispersion options. The body is manufactured from machined aluminium white champagne or black anodized.

### **About Ross Gardam**

Ross Gardam™ is an Australian furniture and lighting company established in 2007. Each product is handcrafted in Melbourne, Australia, by local artisans and makers. Pairing traditional craft techniques with high-end manufacturing technology results in products which are elegant, accessible and made for today. All products are designed by Ross Gardam and are defined by a unique contemporary aesthetic. [Rossgardam.com.au](http://Rossgardam.com.au)
